HTML LIST TAGS

HTML Lists:

HTML lists are allowed to group related items.

There are three types of lists:

1) Ordered Lists
2) Un ordered Lists
3) Definition Lists

Ordered list starts with <ol> tag & each list item starts with <li> tag.

Unordered list starts with <ul> tag & each list item starts with <li> tag.

Definition list starts with <dl> tag. In definition list term starts with <dt> tag & definition starts with <dd> tag.

Ordered List:

1) ..... => It is used to define an ordered list.

2) => It is used to define list item.

Example:

<html>

<body>

<h1>Java Fundamentals</h1>

<hr>

Identifiers

Keywords

Literals

Data Types

Variables

Type Conversions

Operation on Data

</body>

</html>

Attributes of <ol> tag:

1) type="1/A/a/i/I" => It is used to specify the type. Default is 1.

2) start="...." => It is used to specify the starting number. Here the value must be number only.

Example:

<html>

<body>

<h1>Java Fundamentals</h1>

<hr>

<ol start="10" type="a">

Identifiers

Keywords

Literals

```
<li>Data Types

<li>Variables

<li>Type Conversions

<li>Operation on Data

</ol>

</body>

</html>
```

Unordered List:

3) ..... => It is used to define an unordered list.

Attributes of <ul> tag:

1) type="disc/circle/square" => It is used to specify the type. Default is disc.

Example:

```
<html>

<body>

<h1>HTML</h1>

<hr>

<ul type="circle">

<li>Basic Tags

<li>List Tags

<li>Link Tags

<li>Table Tags
```

Frame Tags

Form Tags

</body>

</html>

Definition List:

4) <dl> ..... </dl> => It is used to define definition list(description list).

5) <dt> => It is used to define definition term(description term).

6) <dd> => It is used to define data definition(data description).

Example:

<html>

<body>

<dl>

<dt>JavaSE

<dd>Java platform, Standard Edition

<dt>JavaEE

<dd>Java platform, Enterprise Edition

<dt>JavaME

<dd>Java platform, Micro Edition

<dt>JavaFX

<dd>Java platform, FX

</dl>

```
</body>

</html>
```

Order & Unorder Lists Example:

```
<html>

<body>

<ol>

<li>HTML

<ul>

<li>Basic Tags

<li>List Tags

<li>Link Tags

</ul>

<li>CSS

<ul type="disc">

<li>Color Properties

<li>Background Properties

<li>Border Properties

</ul>

<li>Java Script

<ol type="i">

<li>Identifiers

<li>Keywords
```

```
<li>Literals

</ol>

</ol>

</body>

</html>
```
